

REGION 3 CRISIS CENTERS

FY24 Impact & Accomplishments

Why Crisis Centers Matter

Access to crisis centers divert youth and adults from unnecessary involvement in the justice system, admission to emergency departments, and/or in-patient behavioral health hospitals stays. They can prevent future crises and they promote wellbeing, resilience, and self-sufficiency.

Crisis centers are always open and always free!

Western Idaho Community Crisis Center

Since July 2023

WIDCCC has had over 664 client visits and has served almost 400 individual adults in our region through crisis.

98% of clients

would visit WIDCCC again, if needed, were happy with the quality of service, and felt their cultural needs were valued.

184 adults were diverted

from hospitals, jail, law enforcement interaction, and in-patient care. 18 deaths by suicide or overdose were prevented since July 2023.

Western Idaho Youth Support Center

The new youth crisis center

opened on January 29th after over a year of preparation by Southwest District Health, Pathways of Idaho, and our wonderful partners.

In its first three months

WIYSC has had 55 client visits and has served 26 individual youth ages 11-17 from Canyon, Payette, and Ada County.

Youth who visited WIYSC

were supported with issues related to stress, conflict in the home, abuse, social exclusion, grief, substance use, and suicidal ideation.
